Result	Income Tax
Total tax payable	£5107.20
Tax you've already paid	£5003.40
You owe HMRC	£103.80

This calculation is broken down into the following sections (where appropriate)

Income	Your income and the tax you paid from jobs or pensions, any taxable state benefits (including State Pension) received from Department for Work and Pensions (DWP) and any savings or investments. It includes any benefits paid to you by your employer. For more information go to www.gov.uk/income-tax
Deductions	Any tax relief to take account of things like professional subscriptions, expenses associated with your employment for things like tools and special clothing, retirement annuity payments, death and superannuation benefits (if not already given). For more information go to www.gov.uk/income-tax-reliefs
Allowances	Most people in the UK get a personal allowance. This is the amount of income you can have before you pay tax. There are other allowances due, for example, for those who are visually impaired. For more information go to www.gov.uk/income-tax-rates
Income Tax rate(s)	The tax you pay depends on the amount of your income once your deductions and allowances have been taken off. You can check the details against the P60s, P45s and P11Ds your employer or pension payer may give you. For more information go to www.gov.uk/income-tax-rates
Adjustments	Any tax owed for an earlier year that we have not yet collected or repaid to you will be shown here. Married Couple's Allowance (due to married couples or civil partners where at least one of you was born before 6 April 1935), outstanding debt (for example from tax credits or Self-Assessment) or tax relief due for interest paid on certain loans will also be shown here. If we show a repayment supplement in your calculation this is because we pay you interest when you have paid too much tax and we delay your repayment. We will add interest to your repayment if we do not repay you until after 31 January following the tax year that the repayment relates to.
